## PROFESSIONAL EXPERIENCE

### Stackodile PVT. Ltd

Software Developer

2023 – Present

Muvattupuzha, India

- Developed and maintained dynamic web applications using Laravel, ensuring modular and maintainable code.
- Implemented AJAX-based functionalities to improve user experience and reduce load times.
- Integrated multiple third-party and in-house RESTful APIs for data exchange and service enhancements.
- Designed and optimized MySQL database schemas for performance and scalability.
- Used HTML5, CSS3, Bootstrap, and JavaScript/jQuery to build responsive front-end components.
- Collaborated with cross-functional teams in a fast-paced agile environment, contributing to successful project deliveries.
- Ensured cross-browser compatibility and adhered to best practices in coding and UI design.

- Participated in team meetings, code reviews, and problem-solving discussions to enhance application quality.
- Develop and maintain web application using PHP framework such as Codeigniter,WordPress and Laravel.
- Stay updated with the latest industry trends and technologies to enhance our development processes,
- Experienced in deploying and managing applications on cloud hosting platforms including Shared Hosting and VPS (Virtual Private Server) environments.

### Stackodile PVT. Ltd

Junior Web Developer

2022 – 2023

Muvattupuzha, India

- Utilized web technologies such as JavaScript, HTML, CSS, and jQuery to identify and fix bugs, enhance functionality, and improve overall website performance.
- Perform manual testing to ensure system accuracy and reliability
- Optimized front-end code for better speed, accessibility, and responsiveness across devices and browsers.
- Implemented Gitlab for version control, enabling efficient team collaboration and streamlined codebase management.
- Assisted in the development of new web pages and features according to client and business requirements.
- Participated in code reviews, testing, and documentation to maintain high code quality and consistency.

---

## PROJECTS

---

### DrkStore

06/2025 – 07/2025

Frontend Developer | Backend Developer

- Integrated payment gateway (Razorpay) to enable secure online transactions and manage order payments seamlessly.
- Implemented Shiprocket API for automated shipping, order tracking, and streamlined delivery operations.
- Built dynamic website features including sliders, promotional banners, and a blog module to boost customer engagement and SEO.
- Designed and optimized user-friendly shopping cart functionality with order management, checkout, and secure payment flow to enhance customer experience.
- Integrated FastSMS API to enable real-time SMS notifications for order confirmations, shipment updates, and OTP verifications, improving customer communication.

### Shipforme

07/2025

Backend Developer

- Developed a full-featured multi-role system (Admin, Agents, Customers) to manage vendors, agents, and customers within the same application.
- Designed and implemented parcel shipping workflows, enabling users to create shipments between countries and regions with automated region & weight-based cost calculations.

- Integrated Stripe payment gateway, ensuring secure card-only payments; no cash accepted, compliant with modern online transaction standards.
- Built a customer-facing courier POS module to allow customers to directly handle parcel shipments via the web-based system.
- Delivered a robust monitoring and management software solution used by a Singapore-based company, supporting operations in China, Malaysia, and India.

### **Wohlphysio**

07/2025 – 07/2025

*Backend Developer | Frontend Developer*

- Developed “wohlphysio”, a CMS web application using Laravel, JavaScript, jQuery, CSS, and CKEditor for dynamic content management and SEO optimization.
- Implemented SEO-friendly modules to manage meta titles, descriptions, keywords, and image alt tags to improve search engine rankings.
- Integrated appointment booking functionality to handle patient reservations and inquiries seamlessly.
- Utilized plugins like jQuery Slider, Owl Carousel, and Fancy Popup to enhance frontend interactivity and user engagement.
- Designed an intuitive admin panel for easy content updates, media uploads, and plugin management by non-technical users.

### **Benanofoods**

06/2025 – 07/2025

*Backend Developer | Project Team Member*

- Developed a Laravel-based shopping cart application for banana food products with separate Admin and Customer roles to manage products, orders, and user permissions.
- Integrated FastSMS API for real-time order status notifications via SMS, enhancing customer communication and delivery updates.
- Implemented core eCommerce features such as product listing, cart operations, checkout, and order tracking with seamless user flow.
- Integrated PhonePe payment gateway for secure and efficient digital transactions, eliminating the need for cash payments.
- Designed a fully responsive front-end using HTML, CSS, JavaScript, and jQuery with mobile-first principles, ensuring optimal performance across devices.

### **Bhumika Shipping**

06/2025 – 07/2025

*Backend Developer*

- Developed a Laravel-based data entry system to manage orders, shipping details, and export data to Excel for streamlined operations.
- Integrated Postal Pincode API to auto-fetch address details and improve data accuracy during order processing.
- Designed advanced filter functionalities for searching and managing orders efficiently.
- Implemented courier service modules for easy tracking and management using Delivery and DTDC integrations.

- Ensured smooth API communication and secure data handling for real-time shipping updates and status management.

### **Allnestluxury**

06/2025 – 07/2025

*Backend Developer | Project Team Member*

- Developed Allnestluxury, a Laravel-based car rental and group ownership platform tailored for the New Zealand market, enabling 12-person car sharing for 30-day drive cycles followed by resale.
- Implemented car booking features including token-based reservations, ticket generation, coupon application, and dynamic FAQs for user support.
- Integrated Stripe payment gateway for secure online transactions and automated success email notifications post-booking.
- Built features such as vehicle service assignments, image galleries, customer reviews, blogs, map integration, and in-app group chat functionality to enhance user experience.
- Contributed to mobile app compatibility by building responsive layouts and APIs, allowing seamless use across devices for booking and managing rides.

### **MaxdentCADigital**

01/2025 – 02/2025

*Backend Developer*

- Developed a Laravel-based CMS platform "MaxdentCADigital" for a dental hospital, enabling dynamic content management for a single-page application.
- Implemented admin panel features for managing testimonials, image galleries, client logs, and albums with CRUD functionality.
- Integrated media handling capabilities for uploading and displaying clinic-related content using responsive image galleries.
- Optimized application performance and SEO for a single-page layout with clean URL routing and meta tag control.
- Designed a user-friendly backend interface for non-technical staff to easily manage website content and maintain client engagement.

### **HeroSlide**

2024 – 2024

*PHP Developer*

- Developed a Core PHP-based shopping cart system for website templates with secure customer registration and checkout functionality using AJAX form submission for seamless user experience.
- Integrated Stripe payment gateway to enable real-time subscription handling and secure transactions for purchasing website templates.
- Implemented social login authentication using Google and Facebook, streamlining the user registration and login process.
- Configured SendGrid email service to send purchase confirmations and subscription emails automatically after successful transactions.
- Utilized JavaScript and AJAX to enhance frontend interactivity, improving template browsing and cart performance without full page reloads.

## LNG

2023 – 2023

Backend Developer | Project Team Member

- Developed a multi-role Laravel-based web platform for supporting Admin, Shipper, and Staff users with role-specific access and features.
- Implemented a customer request and shipping request management system, enabling efficient tracking and fulfillment of shipment workflows.
- Built a comprehensive shipment module for managing shipping data, status updates, and logistics operations tailored for shippers and admin users.
- Designed and integrated staff job reporting functionality, allowing staff to submit, update, and review job reports within the dashboard.
- Ensured secure role-based authentication and authorization, using Laravel middleware and policies to separate permissions between Admin, Shipper, and Staff roles.

## SharsudhiMatrimony

07/2025 – 2025

Backend Developer | Project Team Member

- Designed and developed a matrimony portal with core features including user registration, BDA (Business Development Associate) onboarding, profile likes, chat functionality, membership plans, and user galleries.
- Implemented interactive front-end components (sliders, banners, wedding stories, video sections) using HTML, CSS, JavaScript, and jQuery for an engaging user experience.
- Integrated testimonial modules and success stories to build trust and showcase real wedding journeys.
- Developed secure payment integration using Razorpay for smooth online transactions of premium plans and services.
- Supported mobile app compatibility and responsive design to ensure accessibility across devices.

## Deport Shipping

2025

Backend Developer

- Developed a Laravel-based shipping management system for Singapore clients to handle container in/out operations, customer and haulier management, and container rent tracking.
- Implemented vendor admin dashboard with CRUD functionalities to manage containers, customers, hauliers, and rent records efficiently.
- Integrated jQuery Calendar, JavaScript, HTML/CSS, and MySQL to allow dynamic container scheduling, date filtering, and data management.
- Built functionality to export rent data to Excel based on selected daily, weekly, and monthly filters, with rent calculations (e.g., \$10/day) and streamlined reporting.

## Triveni

2025

Backend Developer

- Developed a comprehensive inventory management system for foods and products, efficiently handling stock tracking for breakfast, lunch, and dinner items with a focus on regional cuisines and diverse dietary types.

- Implemented a dynamic shopping cart system supporting multiple meal types (breakfast, lunch, dinner) and categorized by regional cuisines and dietary preferences, enhancing user customization and order accuracy.
- Integrated UberEATS API to seamlessly take and manage food orders, coupled with automated email notifications for order confirmation and status updates, improving customer engagement and operational workflow.
- Enabled secure payment gateway integration ensuring smooth and reliable transactions, supporting multiple payment methods and maintaining data security and compliance throughout the ordering process.

### **Syntax**

*Backend Developer | Frontend Developer*

- Developed a full-stack Laravel-based learning academy website ("Syntax") featuring student and teacher registration/login, with responsive frontend pages including Home, About, Courses, Teachers, and Contact.
- Implemented role-based authentication and user dashboard access using Laravel's authentication system for students and teachers.
- Integrated modern frontend technologies such as CSS, jQuery, JavaScript, SweetAlert, and Toastr for interactive UI/UX, including alerts, form validations, and toast notifications.
- Built an admin panel to manage video classes, teacher details, and course content, optimized for all devices with fully responsive design using Bootstrap and Laravel Blade.

### **Mentor**

2024

*Frontend Developer | Backend Developer*

- Developed a Laravel-based mentor portfolio platform with user registration, personal growth tracking, and one-on-one session scheduling.
- Implemented slot booking with calendar integration to enable efficient mentor availability and meeting management.
- Integrated WhatsApp Chat API to facilitate direct mentor-mentee communication, improving engagement and response time.
- Integrated PayPal and Stripe for secure online payments and managed recurring user subscriptions for mentorship packages.
- Designed intuitive UI/UX using Figma and developed a responsive frontend using HTML, CSS, and JavaScript, along with a custom admin panel for content management.

### **Grace Plus Family Mart**

2024 – 12/2025

*Backend Developer*

- Developed a Laravel-based inventory and billing system to manage grocery product sales with role-based access for Admins, Vendors, Area Sales Managers, Divisional Managers, HROs, Regional Sales Managers, Sales Executives, Sales Supervisors, Shop Sales, State Managers, and Zonal Sales Managers.

- Implemented comprehensive product sales and inventory management including real-time stock tracking, product supply management, and automated billing/invoicing for both shops and corporate sales.
- Designed multi-role workflows where admins oversee vendor management, product supply, and inventory control, while shops handle sales transactions, invoice generation, and daily stock updates.
- Utilized MySQL database for efficient data storage and retrieval, ensuring scalability and reliability in handling sales data, inventory logs, and user roles across the Grace Plus Family Mart ecosystem.

### **Seemas Cart**

2024

*Frontend Developer | Backend Developer*

- Developed a customized e-commerce platform using Laravel, featuring dynamic sections like trending products and new arrivals to drive user interaction.
- Integrated key frontend components including sliders, banners, and responsive product listings for an enhanced user experience.
- Built a secure checkout system with Razorpay payment gateway, including order placement, tracking, and automated inventory updates.
- Integrated FastSMS API for real-time SMS notifications on order confirmations, shipment tracking, and promotional campaigns.
- Designed a robust admin dashboard to manage products, orders, and inventory, with real-time shipping and logistics tracking via Shiprocket API.

### **All Smiles Dental Spa**

2024

*Backend Developer | Frontend Developer*

- Developed a comprehensive admin-side slider management system to dynamically update homepage banners and promotional content, enhancing user engagement and visual appeal.
- Implemented CRUD functionality for managing testimonials, doctors' profiles, blogs, services, and gallery items, enabling easy content updates and streamlined administration.
- Designed and integrated a contact and appointment booking module, allowing efficient handling of customer inquiries and appointment scheduling directly from the admin dashboard.
- Ensured seamless content management with user-friendly interfaces and secured admin access, improving site maintainability and operational efficiency.

### **Smile**

2024

*Backend Developer | Project Team Member*

- Developed Smile Dental Clinic, a responsive Laravel web application optimized for desktop, tablet, and mobile devices, ensuring seamless user experience across all screen sizes.
- Engineered an Admin Dashboard with full CRUD capabilities for Doctors, Testimonials, Treatments, and Gallery items, enabling non-technical staff to manage clinic content effortlessly.

- Implemented an Appointment Booking System complete with automated email notifications to patients upon booking, streamlining scheduling and improving patient communication.
- Created an About section and integrated patient inquiry management, reinforcing clinic branding and facilitating direct engagement with potential clients.

### **Alfmerchandise**

2024

*Backend Developer | Project Team Member*

- Developed AlfMerchandise, a Laravel-based multi-vendor MLM e-commerce platform supporting vendors, members, franchises, and admin roles with role-based access control.
- Implemented core features including shopping cart, product inventory management, and franchisee sales tracking for seamless order processing and fulfillment.
- Built a comprehensive wallet and commission system to manage customer and company earnings, franchisee withdrawals, and multi-level commission structures.
- Integrated charity fund logic and level-based rewards, enhancing transparency and automation in MLM operations across the platform.

### **Ezyxam**

2024

*Backend Developer*

- Developed a multi-role LMS in Laravel with dedicated panels for Admins, Tutors, and Students, enabling seamless role-based access and functionality.
- Integrated course and exam management features, including question/answer modules, real-time progress tracking, and performance reporting.
- Implemented Stripe payment gateway for secure transactions and automated email notifications to enhance user communication.
- Utilized MySQL for efficient data storage and retrieval, ensuring scalable and high-performance backend operations.

### **Checkboard**

2024

*Backend Developer | Project Team Member | Web Developer*

- Developed a fully customizable CMS platform using Laravel, enabling dynamic control over website sections such as banners, headers, footers, images, and brand listings.
- Designed and implemented an intuitive admin panel to allow non-technical users to easily manage and update site content without developer assistance.
- Ensured scalability and flexibility of the platform to support single-vendor requirements while maintaining code cleanliness and modular structure.
- Improved content management efficiency by integrating real-time preview, drag-and-drop features, and secure access controls.

## Welcart

2024

### Backend Developer

- Developed a large-scale multi-vendor e-commerce platform using Laravel, with dedicated role-based panels for Admin, Sellers, Partners, and Customers.
- Integrated Razorpay for secure online payments, along with features like product availability by location and dynamic dashboards per user role.
- Implemented automated commission splitting logic to distribute earnings across roles after each transaction, ensuring accuracy and transparency.
- Integrated FastSMS API to enable automated transactional and promotional SMS notifications for user activities, such as order confirmations, status updates, and OTP verifications.
- Boosted platform performance by utilizing a Content Delivery Network (CDN) and integrating third-party plugins for caching, image optimization, and real-time analytics.

## Sneham Trust

2023

### Backend Developer

- Developed the frontend using HTML, CSS, and JavaScript for key web pages including Donate One Meal, Blood Donation Form, Blogs, Videos, Become a Volunteer, Courses, and Careers.
- Integrated Razorpay payment gateway to enable secure online donations directly through the frontend.
- Implemented admin controls for managing donations, volunteer registrations, and dynamic website content.
- Built and managed backend functionality in Laravel to handle form submissions, donor data, blog management, and user interactions.

## DishaSoft

2023

### Backend Developer

- Developed and deployed SEO-friendly company website “DishaSoft-- Info Solutions” using Laravel, ensuring optimized meta tags, URLs, and fast-loading pages for improved search engine visibility.
- Built dynamic modules including Services, Training, About Us, Blogs, Gallery, and Contact with secure email notifications to admin via contact form.
- Integrated JavaScript, jQuery, and CDN resources to enhance frontend interactivity, maintain performance, and reduce server load.
- Designed a fully responsive UI compatible across all devices using mobile-first design principles and tested for cross-browser compatibility.

## Stackodile

2023

### Frontend Developer| Backend Developer

- Developed a custom web application using Laravel with separate admin and frontend panels to manage user and business workflows efficiently.
- Designed and implemented a domain expiry alert system that automatically sends email notifications to admins.

- Ensured proactive domain management by integrating scheduled tasks using Laravel Scheduler and Mail services.
- Focused on delivering a seamless user experience by maintaining clean architecture and intuitive UI/UX across both panels.

Uniqqatar 

2024 – 2025

Frontend Developer | Backend Developer | API Developer

- Developed and maintained a full-stack web platform using PHP 7.3 and Laravel 8 for UNIQ Qatar, an association supporting Indian nurses in Qatar’s healthcare sector, focusing on performance, security, and scalability.
- Implemented content management modules including Events, Blogs, News, Gallery, Members, Offers, and Advertisements, enabling admins to easily manage mobile and web content.
- Designed and developed RESTful APIs for mobile applications, supporting features such as notifications, event updates, member data, and dynamic content delivery.
- Integrated email notification systems to send automated event announcements, updates, and newsletters to members, improving engagement and communication.
- Built mobile-first and responsive web features, including app deep links, useful links, and push notification support, ensuring seamless user experience across web and mobile platforms.
